④ Bearing	1	554-543-400		
⑤ Shaft Bushing	1			
⑥ Grease Fitting	1			
⑦ Lower Shaft 1" PE	1			
⑧ Grease Cap Screws	2	554-542-600		
Optional				
7/8" PE Rod Spinner		557-501-500		

The **Topco Rod Spinner** was engineered as a safety device to handle the release of sucker rod energy when a Progressive Cavity Pump is unseated. It reduces the risk of danger to the crew as well as preventing surface equipment from being damaged.

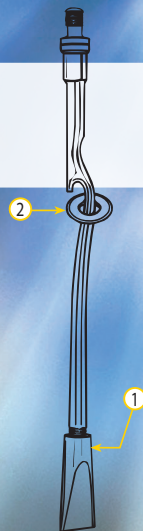

It has been designed for efficiency to quick connect to Rod Clevis on most energy service rigs, flushbys and rod rigs. It has a load rating of 50,000 Lb allowing the Rod Spinner to be used to pull on both sucker and polish rods.

Canadian Patent Number 2,282,822 United States Patent Number 6,253,844
